Founder · Full-Stack & Blockchain Engineer · AI Architect

SOLANA MOBILE · REACT NATIVE · RUST / NODE · LLM INFRASTRUCTURE · CRYPTOGRAPHY · AUTOMATION

CORE STACK

TypeScript · JavaScript
React Native · Expo
Node.js · Python
Rust (learning)
HTML5 · CSS3

SOLANA / WEB3

Solana web3.js
Mobile Wallet Adapter
Anchor (read) · SPL
Jupiter · Drift APIs
Ethers.js · Web3.js
Solidity (basic)

AI / LLM INFRA

OpenAI · Claude · Gemini
Agentic workflows
Prompt engineering
RAG pipelines
n8n automation
Claude Code · Cursor

SECURITY / QA

AES-256-GCM · ZK patterns
Smart-contract testing
dApp & wallet QA
Information theory

LANGUAGES

KZ Native
RU Fluent
EN B2 — Upper Int.

EDUCATION

K.I. Satpayev KazNTU
Information Security · 2005
Faculty of Informatics

PROFILE

Independent engineer, active in crypto since 2018 and shipping production Web3, mobile and AI systems since 2019. Currently founding a deep-tech startup focused on the economics of large-language-model inference — research toward dramatically lower per-call cost at scale, with patent protection in progress. In parallel, two apps are live in the Solana Seeker native dApp Store, both designed, built and shipped solo end-to-end. Background in Information Security keeps cryptography and correctness as first-class concerns rather than afterthoughts.

SELECTED PROJECTS

VRLR

FOUNDER · PATENT PENDING

Deep-tech research and product work on reducing the cost of large-language-model inference at scale. USPTO provisional patent filed by the founder. Solo design and engineering across the full stack from research to production service. Currently applying to selective deep-tech residencies.

PYTHON · FASTAPI · ML INFRA · PATENT — USPTO

Seeker Vault

SOLANA SEEKER · LIVE

Zero-knowledge encrypted local vault for Android, unlocked by a Solana wallet signature via Mobile Wallet Adapter (Phantom, Solflare, Seeker). AES-256-GCM, 200 MB private file storage, no backend, no telemetry. The encryption key is derived from a wallet-signed challenge — no server-side secrets exist by design.

REACT NATIVE · TYPESCRIPT · SOLANA MWA · WEB3.JS · AES-256-GCM

X-Booster / Aibat

SOLANA SEEKER · LIVE

Twitter follower-exchange service built natively for the Solana Seeker phone. Wallet-gated access, on-chain action attestations, rate-limit-aware Twitter API orchestration.

REACT NATIVE · SOLANA · TYPESCRIPT · TWITTER API

SnapTap

TELEGRAM MINI APP · IN DEV

Tap-to-earn game on Telegram Mini Apps with leaderboards and referral mechanics; Solana DeFi arbitrage routing via Jupiter and Drift on the reward side.

TYPESCRIPT · TELEGRAM WEBAPP · JUPITER · DRIFT · NODE

SELECTED PROJECTS – CONTINUED

HeyAI

AI AUDIO PLATFORM · IN DEV

Real-time AI music-production review platform with live stream queue: mix balance, arrangement, and reference-track comparison. LLM orchestration over audio-analysis features with a streaming UX.

NODE · OPENAI · AUDIO DSP · N8N · STREAMING

Alstrologer

MOBILE · GOOGLE PLAY OPEN BETA

Consumer mobile app generating personalised horoscopes via Gemini, with prompt templates tuned for astrological coherence and a freemium monetisation loop.

REACT NATIVE · GEMINI · OPENAI

dTox Browser

MOBILE · IN DEV

Minimalist focus browser eliminating ads and attention traps. Custom rendering pipeline and content-policy layer.

REACT NATIVE · WEBVIEW · CONTENT FILTERING

EXPERIENCE

Independent Developer — Mobile, Web3 & AI

2019 – PRESENT

Self-directed product work · Almaty

End-to-end design, implementation, release and growth of mobile, Web3 and AI products. Five+ shipped products across the Solana Seeker dApp Store, Telegram Mini Apps, and Google Play. Daily work in React Native, TypeScript, Solana tooling, Mobile Wallet Adapter, and LLM integration. Sole developer on every listed project. In 2026 founded an independent deep-tech research effort focused on LLM inference economics (patent filed, stealth).

Blockchain QA & Smart-Contract Tester

2020 – PRESENT

Independent engagements · Remote

Functional, security and usability testing of dApps, smart contracts, wallets, and CEX / DEX integrations. Tokenomics and roadmap review for early-stage projects; active in IDO / IEO, staking, and L1 / L2 evaluation.

EARLIER – PRE-TECH LEADERSHIP (2005 – 2019)

- | | | |
|-------------|---|--|
| 2018 – 2019 | IT & HR Manager · ParasatSamex Co. Ltd · Almaty | Reformed HR processes, introduced KPI system, managed IT infrastructure and partner negotiations. |
| 2016 – 2017 | Technical Director · SIA Amakids · Latvia | Launched franchise educational centres; hiring, technical operations, design and marketing materials. |
| 2009 – 2016 | Board Member · SIA GASD · Latvia | Business planning and international partner management (Turkmenistan, Russia); restaurant-sector projects. |
| 2005 – 2006 | Lead Specialist, MTO · GRK (Kazatomprom) · Kazakhstan | Contracts, supplier management, tender documentation; authored 10-year corporate strategy presentation. |

RESEARCH / IP

VRLR — independent research on improving the cost-efficiency of large-language-model inference at scale. USPTO provisional patent drafted and filed by the founder. Further technical detail available under NDA.
